Subject: FROM UTAH DIVISION OF OIL, GAS AND MINING
Attachments: revise-amend-criteria.doc

Roger and Larry,

Please find attached the criteria for amendments and revisions. We can engage in further discussion about the plan modification being defined as a revision or amendment. As mentioned, if the existing maps and calculations are added as an appendix to the plan, then with the increased substance from 1987, it will be better suited to reflect the ground conditions and defined as an amendment.

The process for adding an appendix is straightforward, however, the Division requires two copies of the submittal, so the permittee can have an 'approved' set. I can provide the details needed to implement the appendix.

I have June 25 meeting scheduled here at the Division offices.

I have contacted Emily at the Public Information Center and provided her with the 1987 plan. Please ensure you contact her to request its submittal to you.

You will also receive a copy of this undated 'amendment' we talked about today from Minerals scanner, Pam Sandberg.

Please advise the time you need to review these documents, so we can engage in further discussion and move forward on implementing these permitting actions.

Please let me know if I can be of any help.

Beth
